

**BE MORE  
ECO**

The slide features a white background with green decorative elements. At the top left, there are two horizontal green bars. In the top right corner, there is a cluster of green dots of varying sizes. At the bottom left, there is another cluster of green dots. At the bottom right, there is a large, irregular green shape that resembles a stylized wave or a splash.

# Cons of coal heating

- non-renewable energy source
- not easily available everywhere
- corrosive
- bagged coal can be expensive
- lightening is more difficult than in other stove
- major source of air pollution

The slide features decorative elements: two horizontal green bars at the top left, a cluster of green dots in the top right, a cluster of green dots in the bottom left, and a large green wavy shape in the bottom right. The main title is centered in a large, black, serif font.

# Greener ways to heat your home

- solar panels
- ground source heat pumps
- air source heat pumps
- geothermal heating
- biomass boilers
- wood stove
